

Event report on “Gemini For Everything”

Date of the event held: 21st September, 2024

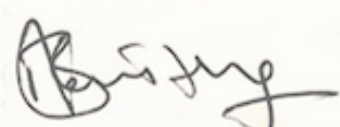

Organizer: CodeOholics Club

Venue/Place: CMR Technical Campus Auditorium - D Block

Number of students Participants (Students and Staff): 982

Description about the Event: The one-day event focuses on utilizing Google AI technologies like Gemini, Gemma, GenKit, and PaLM to simplify the creation of AI-powered applications without the need for extensive training. Participants will engage in hands-on learning and application development. Key speakers include Mr. Bilal Aamer, Mr. Anish Chittigidde, Mr. Hema Sai Charan, and Mr. Saad Shaik, who will provide valuable insights to help attendees effectively harness AI technologies for innovative solutions.

Outcome of the event: The event equips participants with essential resources and insights for leveraging AI across various frameworks and languages. Attendees gain free Google Cloud credits, access to Google Codelabs, curated cheat sheets, and demos from speakers, fostering hands-on learning. Additionally, they can engage with industry experts through fireside chats, receive support from the TensorFlow User Group for project development, and win goodies through quizzes, enhancing their overall experience and knowledge in building AI-powered applications.
